## Summary

---

I am a Software Test Engineer actively involved in all stages of the test lifecycle, designing test scenarios, and executing comprehensive manual and automated tests for both web and mobile (iOS and Android) applications. My background in frontend development enhances my ability to analyze user interfaces and perform detailed UI/UX testing. I am also continuously improving my proficiency in automation testing tools.

## Experience

---

**QA Tester**, Sisal Hub Türkiye – İstanbul Oct 2024 – Present

- I created test cases and test scenarios by analyzing User Requirement Documents and functional specifications.
- I performed manual and automated tests on web and mobile applications on different devices and environments.
- I found bugs and tracked their resolution, collaborating with developers throughout the development lifecycle.
- I performed regression testing and smoke testing before each release cycle.
- I designed and executed API tests using Postman for backend validation.

**QA Tester Intern**, Sisal Hub Türkiye – İstanbul Sep 2024 – Oct 2024

**Frontend Developer**, Arute Solutions – İstanbul Dec 2023 – Aug 2024

- Using React, React Native and Tailwind CSS I developed responsive and reusable user interfaces.
- I used JIRA to manage front-end development tasks and bug tracking in an Agile/Scrum environment.

**Frontend Developer Intern**, Arute Solutions – İstanbul Nov 2023 – Dec 2023

## Education

---

**Dogus University**, Software Engineering 2020 – 2024

**Pendik Anatolian High School** 2015 – 2019

## Projects

---

### Selenium Cucumber Test Automation Project

- I built a test automation framework using Selenium, Cucumber, TestNG and Maven to perform web application testing in different browsers and environments. I designed BDD scenarios and managed test execution with TestNG and Maven.

**Github Link:**<https://github.com/Yusufdmrc/selenium-project>

### Appium Test Automation Project

- I built a mobile test automation framework using Appium and Java to test Android and iOS apps. I created test scripts, ran them on multiple devices and managed the test flow with TestNG and Maven.

**Github Link:**<https://github.com/Yusufdmrc/appium-project>

## Certificates

---

**ISTQB Foundation Level (CTFL)** Jul 2025

**Link:**<https://app.diplomasafe.com/en-US/certificates/de97aba5e37f221c0e1c7a6137f6304c466103bfd>

## Skills

---

**Languages:** Java, JavaScript, SQL

**Tools - Frameworks:** Selenium, JUnit, TestNG, Cucumber, Appium, Postman, Jenkins, JMeter, Git, Maven

**Soft Skills:** Team collaboration, Critical thinking, Open to feedback, Time management, Problem solving
